"On the contrary, I have every rea son to believe that he is not."

The brisk man pondered again, "You are setting us a difficult problem, my dear woman. Such cases, you must know, involve heavy expenditure. I may say a very heavy expenditure." He paused as he darted another shrewd glance toward the veiled client

"Will you name an estimate of that expense?" she asked, quietly. "Certainly; we could not conduct

such a case under \$5,000."

The woman drew a roomy purs

from her cloak and counted out ten yellow-backed bills.

"Here is \$1,000. If you will bring me evidence that will secure a divorce, I will increase it to \$10,000." caressingly.

The velled woman hesitated and then pronounced a name that brought a low, involuntary whistle from the other's lips. It, was that of one of the best known men of Wall street.

The detective gazed after the departing figure of his client, with puckered brows. But he did not realize until a week's "shadowing" of H. Sylvester Jones had proved ineffectual, just how difficult was the problem she had left him. To all intents and purposes, H. Sylvester Jones was a model husband in the eyes of the law. On the eighth day a bright idea came to the head of "Sharp & Son." For a moment he sat with a broad grin on his face. Then he pushed a bell and a young woman in a plain dress and with a careworn face, entered from an inner room.

The man spoke a dozen curt sentences, straight to the point. "I want you to get acquainted, Minnie, with H. Sylvester Jones."

The detective paused.

Minnie stiffened her shoulders and a quick flush sprang into her pale swept his eyes over her quietly cheeks. A keen observer might have seen that under certain conditions she might be beautiful. Gradually tired eyes dropped and the bent shoulders relaxed. Minnie had conquered herself. She was thinking of sick mother and little sister.

"And what do I get?" she asked. The detective held up the ten yel reason to believe that your husband low-backed bills. "These are your: for the affidavit. You know where to go for the clothes. An agent of "Sharp & Son," loitering in the corner, noticed the circumstance and reported it to his chief, The latter smiled broadly and the next morning eagerly awaited Minnie's arrival. When noon came and she did not appear, he looked worried. When evening came without her, he sent for his agent and the two conferred together. The next day he received a note. It was a remarkable note, and under it was the scrawling signature of Minnie:

"I do not want your \$1,000, and I hereby resign my position."

The detective swore and called for his agent again. The latter looked glum and started on a search for the missing girl. The first complete cargo of soya beans that arrived in the United Kingdom, says a consular report, reached Liverpool February 14, 1909, and the interest in this new industry has grown apace since then, experiments made in various other parts of England as well as in Liverpool that range from a blend of soya flour, made by an expert Liverpool baker with flour and meal, about one-fifth for meal, to a soya dog biscuit.

Thousands of American farmers have settled in the above mentioned provinces during the past year; men who know the West and its possibilities, and who also know perhaps better than any other people, the best

speaking of Canada: "We have been going ahead so rapworld. We have not been conscious that there is on the north a young country and a young nation that is looking forward, as it well may, to a great national future. They 7,000,000 people, but the country is still hardly scratched."

Canadian Club of Winnipeg a few days ago said:

"I go back for 53 years, when I came West from Canada, At that time boy or man who desired to carve his own way had to cross the line, and to-day it may surprise you—one out of every five children born in Canada lives in the United States. Now you are playing the return match, and the North-West is getting people from the United States very rapidly. We brought 100 land-seekers, mainly from Iowa and Southern Minnesota, last night out of St. Paul, going to the North-West. Now, these people have all the way from five, ten to twenty thousand dollars each, and they will make as much progress on the land in one year as any one man coming from the Continent of Europe can make, doing the best he can, in ten, fifteen, or twenty years."

It is evident from the welcome given American settlers in Canada that the Canadian people appreciate them. Writing from Southern Alberta recently an American farmer says:-Ideas about being good farmers, and they are giving us some new ideas about being good citizens. They have a law against taking liquor into the Indian Reservation. One of our fel-The detective bounded from his chair and Minnie tossed her head. "Mr. found him, and let me tell you, they times a day. Excellent too as a tonic find everyone who tries to go up against the laws of the country.

"On Saturday night, every bar-room is closed, at exactly 7 o'clock. Why? There isn't a bad man in the whole district, and a woman can come home from wants to, alone. That's Canada's idea how to run a frontier; they have certainly taught us a lot.

"On the other hand, we are running their farms for them better than any other class of farmers. I guess can say this without boasting, and the Caandians appreciate us. We turn out to celebrate Dominion Day; they are glad to have us help to farm the country; they know how to govern; we know how to work."

Another farmer, from Minnesota, who settled in Central Saskatchewan some years ago, has the following to say about the country:-

"My wife and I have done well enough since we came from the States; we can live anyway. We came in the spring of 1901 with the first carload of settlers' effects unloaded in these parts and built the first shanty between Saskatoon and Lumsden. We brought with our car of settlers' effects the sum of \$1800 in cash, to-day we are worth \$40,000. We 'proved up' one of the finest farms in Western Canada and bought 320 acres at \$3 per acre. We took good crops off the land for four years, at the end of which we had \$8000 worth of improvements in the way of buildings, etc., and had planted three acres of trees. Two years ago we got such a good offer that we sold our land at \$45 per acre. From the above you will see that we have not done badly since our ar-

rival." Prof. Thomas Shaw of St. Paul, Minnesota, with a number of other well known editors of American farm journals, toured Western Canada recently, and in an interview at Winnipeg said

in part:-With regard to the settlement of the West I should say that it is only well begun. I have estimated that in Manitoba one-tenth of the land has been broken, in Saskatchewan onethirtieth and in Alberta, one-hundred and seventy-fifth. I am satisfied that in all three provinces grain can be grown successfully up to the sixtleth parallel and in the years to come your vacant land will be taken at a rate of which you have at present no con-ception. We have enough people in the United States alone, who want homes, to take up this land.

"What you must do in Western Canada is to raise more live stock. When you are doing what you ought to do in this regard, the land which is now selling for \$20 per acre will be worth from \$50 to \$100 pre acre. It is as good land as that which is selling for more than \$100 per acre in the corn

"I would rather raise cattle in Western Canada than in the corn belt of the United States. Nou can get your food cheaper and the climate is bet-ter for the purpose. in Five Hours. Much is being done in these days to stop the ravages of consumption, to break up a cold and cure coughs, bronchitis, tonsilitis, etc., with simple home-mixed medicine. A laxative home-mixed medicine. A laxative cough syrup, free from whiskey is the prime need. A cough indicates in-flammation and congestion and these in turn are due to an excess of waste and poisons in the system. A tonic laxative cough syrup rids the system of congestion, while relieving the painful coughing. Get the following and mix at home: One-half ounce fluid wild cherry bark, one ounce compound essence cardiol and three ounces syrup white pine compound. Shake the bottle and take twenty drops every half hour for four hours. Then one-half to one teaspoonful three or four times daily. Give children less, according to age. Cut this out and save it for some friend.

An other exhibition of the National association has just closed a campaign in Colorado, and is now touring Oklahoma. A state-wide fight will be waged in this state. Later, this exhibition will go to Arkansas,

Diet of the Old. A sane diet for a person of 70 or 75 should be made up largely of vegetables and fruit, some fish, some eggs,

a little meat and simple cereals, if there is no inclination toward obesity. Drinking with one's meals is not considered advisable, especially as liquids are apt to wash down the food before it is properly masticated. Two quarts of water, or more, should be taken between meals, however, during the day. Hot water is especially good for one who does not exercise much, as it flushes out the entire system. Stimulants, such as tea and coffee, should not be very strong.-Harper's Bazar.
